PixelBuilder v2.0.1

PixelBuilder is a project made by [], whose Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

Frequently Asked Questions ::

What bead colors do you include?
Currently, we provide all Perler beads and Artkal colors!
You can sort your search through the filters to contain
one or the other (or both).

Can we request other brands of beads?
If you can provide me the HEX codes, certainly! All that'll
require is a few additions to my database and I love to
help! :)

PixelBuilder

Rules ::

While you don't have to post online everything you make, I can't stop you from making whatever. But, if you want to post it to the community, the pattern has to go through clearance – which is done by the creator (me). I am the judge, jury, and executioner here.

That's really the only rule. Don't post gross shit, but it doesn't even really matter if you do because I can just delete it before any other set of eyes see it.

templates

Name of perler bead color selected down here.

color drop down is a multichoice filter where you can select brand and/or 1-or-more color groups.

grid checkbox toggles the canvas (the space in the center) grid on and off.
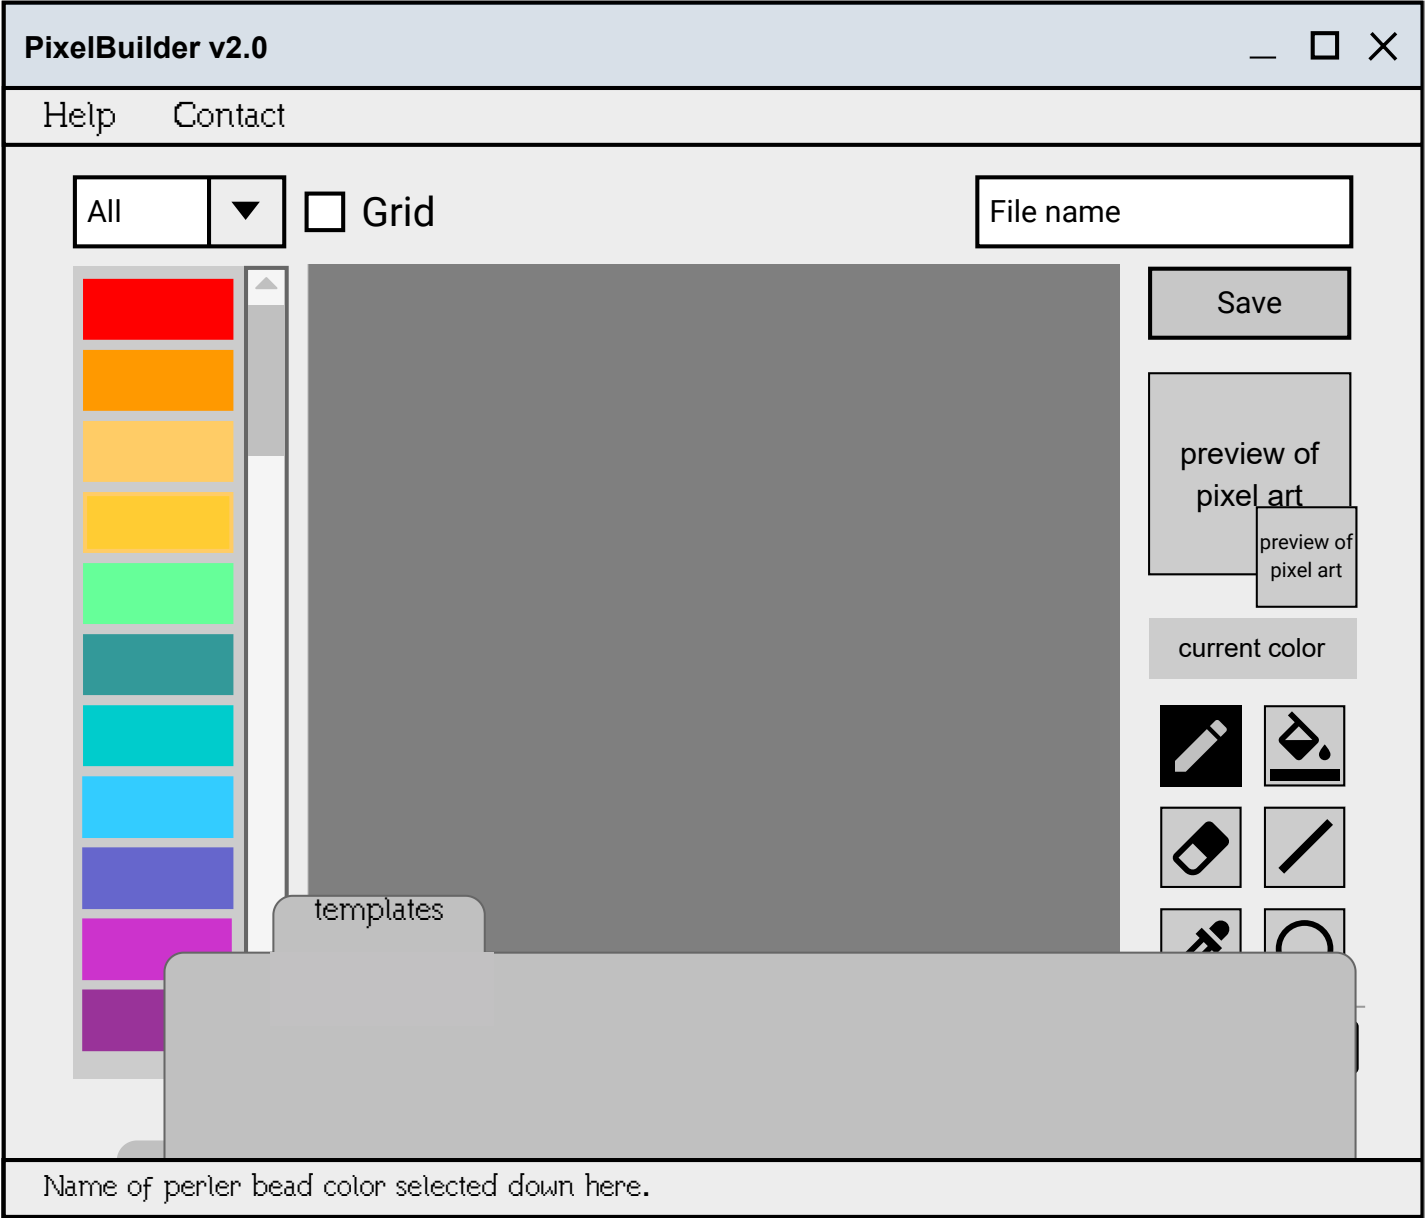

canvas is where the user draws. (specify sizes here)

file name text field and the save button are what you do once you're done with your art ! just enter the file name in and hit save

preview of pixel art shows whats drawn on the canvas within a 100x100 box and a 50x50 box. you click on them to switch which view is "up front".

current color shows the color selected from the color field on the left side. that same color is what the tools are going to be using.
